WE ARE HIRING

ITW, an Industrial Global Company, is looking for its Reagents Division a

Analysis & Development (A+D) Technician

Reports To: Division Technical Director

Location: Castellar del Vallès (Barcelona)

Mission:

Give analytical support to the Innovation team and actively participate in new projects under development. Contribute to ensure that the products in our portfolio are aligned with market requirements in terms of quality.

Main Tasks & Responsibilities:

- Development of analytical methods for new products.
- Follow-up of the stability of new or improved products.
- Study of the viability of quality improvement for existing products.
- Create and/or update technical datasheets and analytical procedures.
- Give support to several departments regarding enquiries or complaints from customers.

What are we looking for:

Chemistry Graduates with focus on analytical chemistry who are willing to grow professionally in a solid and experienced Company

We are seeking highly motivated graduates with a degree in Chemistry to join our team and advance their careers with us. Our company offers a dynamic and challenging work environment where you will have the opportunity to apply your knowledge and skills, and to learn from experienced professionals. As a member of our team, you will work closely with the Innovation and Technical Departments on a variety of projects. You will receive training and guidance from our experienced staff and will have access to the latest technologies and resources to help you excel in your work.

ITW Reagents

WE ARE HIRING

We are looking for individuals who are passionate about Chemistry, have a strong work ethic, and are eager to learn and grow with our company. This is an excellent opportunity for recent graduates who are looking to kick-start their careers and make a meaningful contribution to the field of Chemistry.

Requirements:

- Bachelor's or Master's degree in Chemistry
- Strong academic performance
- Specialization in analytical chemistry, with knowledge in instrumental analysis
- Excellent communication and interpersonal skills
- Ability to work independently and as part of a team
- Willingness to learn and adapt to new challenges

Previous experience in other companies will be valued and transversal skills in the candidate, such as planification capacity and innovative mindset will also be highly valued. Good English level and knowledge in standard analysis regulations (pharmacopoeias, ACS, food additives regulations) will be a plus.

If you are a methodical and organized person interested in joining our team and advancing your career in Chemistry, please submit your resume and cover letter for consideration. We look forward to hearing from you!

Our Company:

Since its founding in Chicago (USA) more than 100 years ago, ITW has become one of the world's leading diversified manufacturers of specialized industrial equipment, consumables, and related service businesses.

ITW business serves local customers and markets around the globe. The company has operations in 51 countries that employ more than 46,000 people who adhere to the highest ethical standards. ITW
